

Angel G. Jordan (1986)

For contributions to solid-state device research and for innovative leadership in engineering education.

Robert M. White (1989)

For technical contributions and leadership in the area of magnetic engineering.

Pradeep K. Khosla (2006)

For contributions to design and sensor-based control in robotic systems for the assembly of high-precision electronics and for leadership in engineering education.

Mark H. Kryder (1994)

For contributions to the understanding of magnetic domain behavior and for leadership in information storage research.

Elected to the National Academy of Engineering:

Edmund M. Clarke (2005)

For contributions to the formal verification of hardware and software correctness.

Takeo Kanade (1997)

For contributions to computer vision and robotics.

Randal E. Bryant (2003)

For contributions to symbolic simulation and logic verification.

Daniel P. Siewiorek (2000)

For contributions to wearable computers, multiprocessor design, reliable systems, and automated design synthesis.
