Midterm II Grades

Average = 108
Max = 176
Min = 56
Stdev = 56
Question 1

The bar chart shows the number of students' scores across different percentage ranges. The peak in the 40% range indicates that a large number of students scored around 40%. The number of students decreases significantly as the scores increase or decrease from 40%.
Question 2

The bar chart shows the distribution of scores among students. The x-axis represents different score percentages ranging from 10% to 100%, while the y-axis represents the number of students. The chart indicates that the majority of students scored between 50% and 60%.
Question 3

Number of Students

Score

10%  20%  30%  40%  50%  60%  70%  80%  90%  100%
Question 4

The bar chart shows the distribution of student scores. The x-axis represents the score percentages (10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90%, 100%) and the y-axis represents the number of students. The chart indicates that the highest number of students scored between 50% and 60%. The number of students decreases as the score percentage increases and decreases further as the score percentage decreases.
Question 5

The bar chart shows the number of students who achieved scores ranging from 10% to 100%. The highest number of students (12) achieved a score of 10%, followed by a score of 20% (10 students). Scores of 30%, 40%, 50%, 60%, 70%, 80%, 90%, and 100% are represented with lower numbers of students: 2, 2, 2, 2, 2, 2, and 2, respectively.
Question 6

![Bar chart showing the number of students for each score percentage from 10% to 100%. The chart indicates that the highest number of students scored between 20% and 30%.](image-url)
