

BIG DATA ANALYTICS & MACHINE LEARNING

DECEMBER 4TH AND 5TH, 2018

11 am - 5 pm

Singleton Room, Roberts Engineering Hall

This workshop will introduce scalable data analytics and machine learning. It is a two-day, hands-on workshop using Hadoop, Spark and TensorFlow. There are no prerequisites, although some familiarity with Python would be helpful.

Please bring your laptop. Visit the following link to learn more and to register:

<https://www.psc.edu/current-workshop>

The event is free of charge, but seating is limited, so registration is first-come. Contact tmaiden@psc.edu with any questions.

This workshop is presented by the National Science Foundation XSEDE program and the Pittsburgh Supercomputing Center.
