Deliverable	Evaluation	Points Given	Points Possible	Evaluation Criteria	Notes
PROJECT 8		**0**	**143**		
Grading TA					
Source code and warnings		**0**	**100**		
	.tgz file		10	File contains all files required to build the system, placed in appropriate directories and with appropriate permissions	
	_build.sh		20	Build file compiles and initializes all aspects of VM	
	_run.sh		10	Runs mazes 1, 2, and 3 without error	
	_run.sh cleanup		10	No cleanup required to run successive mazes	
	warnings		50	Compiles warning-free with required warnings enabled	
p08_writeup_[...].pdf		**0**	**39**		
	a. Warnings		4	Gives number of warnings and names the most surprising one	2 pts for each part
	b. lessons learned		10	Most difficult warning and lesson learned	5 pts for each part
	c. compiles clean		5	Screen shot indicating warning-free compilation from command line	
	d. build & run		5	Screen shot of _build.sh showing un-tar and build invocation	
	e. maze run		5	Screen shot of _run.sh showing command and maze window	
	f. maze 2 & 3		4	Screen shot showing maze 2 and 3 attempts	2 pts for each part
	g. static analysis outcome		4	Did static analysis help find bugs that improved maze solving?	
	h. Feedback		2	Gives any feedback about Project 8; Student name is stated in writeup	
Project08_[...].zip		**0**	**4**		
	Project zip file		4	All files follow the naming convention as instructed in the writeup
